Graduate visa: Full UK work rights until late 2028

SUMMARY

MSc Artificial Intelligence graduate (University of West London, 2026) who builds and rigorously evaluates LLM systems on financial data. Doubled answer accuracy on UK iXBRL filings (45% to 92%) with tag-aware retrieval, then shipped it as a live public app with automated evaluation and CI. Seeking AI/ML engineer and data analyst roles in fintech and responsible AI.

SKILLS

Languages and ML: Python (Pandas, NumPy, Scikit-learn, PyTorch), SQL, C++

LLM and evaluation: RAG, LLM evaluation, hypothesis testing, bootstrap CIs, Generative AI, Chatbot, Claude and OpenAI APIs

Engineering and tools: Git, GitHub Actions CI, iXBRL Financial Reporting, pytest, Flask, SQLite, Linux, Tableau, SPSS

PROJECT

TagTrace: hallucination-resistant Q&A on UK annual reports | *MSc Dissertation*

ixbrl.nikhilrana.com.np

- Developed an iXBRL parser and fact store (5,605 numeric and 1,501 narrative facts, 12 UK filings) and a 102-question benchmark; tested three conditions on two LLMs.
- Tag-aware retrieval raised accuracy from 45.1% to 92.2% (+47.1 pp, 95% CI 37.3 to 56.9); GPT-5.6 Terra replicated the gain (43.1% to 84.3%).
- Deployed publicly: the server checks every cited fact and does the arithmetic itself, so the model cannot invent a figure. It abstains when the filing has no tagged answer.
- Added a regression suite to CI: a free retrieval checks on every pull request (93% recall@15), end-to-end accuracy runs (66% correct, 5% wrong) under a \$0.50 spend cap, and 54 automated tests.

EXPERIENCE

Data Analyst Intern | *WorldLink Communications, Nepal*

Mar 2024 to Jun 2024

- Built two K-Means pipelines in Python for Nepal's largest ISP (900k+ customers): a 4-profile customer segmentation and a 3-cluster churn-risk model.
- Analysed a 1,600-respondent, 7-region survey in SPSS and presented segmentation and churn findings to the Marketing Manager to shape campaigns.

Operations Administrator | *Project Partner Solution, Nepal*

Aug 2024 to Jul 2025

- Built and maintained the company website and managed hosting (cPanel, Cloudflare DNS); handled client communications and administration.

Trading Assistant (Part-time) | *Sainsbury's, London*

Oct 2025 to present

- Worked in a fast-paced, compliance-critical environment alongside a full-time MSc.

EDUCATION

MSc Artificial Intelligence | *University of West London*

Sep 2025 to Sep 2026

- Distinction (expected). Modules: Big Data Analytics, Deep Learning, Machine Learning, Responsible AI.

BSc Computer Science and IT | *Tribhuvan University, Nepal*

Jan 2020 to Aug 2024

- UK 2:1 equivalent. Modules: Statistics and Probability, Data Mining, Simulation and Modelling, Numerical Method.

HACKATHONS AND OTHER PROJECTS

- FRC Hackathon:** studied LLM hallucination on structured UK iXBRL filings. **VLGE AI Hackathon:** 3rd place.
- Exoplanet ML Hackathon:** LightGBM quantile forecasting.
- Earlier work:** Responsible AI framework for BART summarisation (bias, privacy, transparency); customer segmentation and discount elasticity analysis; facial recognition voting system with OTP.
