Graduate visa: Full UK work rights until late 2028

SUMMARY

MSc Artificial Intelligence graduate (University of West London, 2026). with experience developing and evaluating LLM systems for financial reporting data. Built a RAG-based solution that improved answer accuracy on UK iXBRL filings from 45% to 92% and deployed it as a public application with automated testing and CI/CD. Seeking AI/ML Engineering or Data Analyst opportunities within fintech, data science, and responsible AI.

KEY ACHIEVEMENTS

- Raised LLM answer accuracy on UK annual reports from 45% to 92%. A second AI model went from 43% to 84%.
- Put the project live as a public app, with automated testing, evaluation and CI/CD.
- Placed 3rd at the VLGE AI Hackathon: built a working prototype of an AI-driven immersive experience using the VLGE tool.

SKILLS

Languages and ML: Python (Pandas, NumPy, Scikit-learn, PyTorch), SQL, C++

LLM and evaluation: RAG, hypothesis testing, bootstrap confidence intervals, Generative AI, Claude and OpenAI APIs

Engineering and tools: Git, GitHub Actions CI, iXBRL Financial Reporting, pytest, Flask, SQLite, Linux, Tableau, SPSS

PROJECT

TagTrace: question answering on UK annual reports, with every figure checked | MSc Dissertation | ixbri.nikhilrana.com.np

- Built a parser and database of 5,605 numeric and 1,501 text facts from 12 UK annual reports, plus a 102-question test set, and compared three set-ups on two AI models (Claude and GPT-5.6 Terra).
- Giving the model the tagged figures raised accuracy from 45.1% to 92.2% (+47.1 points, 95% confidence interval 37.3 to 56.9). GPT-5.6 Terra improved too, from 43.1% to 84.3%.
- The live app checks every cited figure against the filing, does the arithmetic itself, and says "not found" when the filing has no answer.
- Automated checks on pull requests: 65 unit and integration tests, and a retrieval test that finds the right fact in the top 15 results 93% of the time. The live pipeline scores 66% correct and 5% wrong, with test spend capped at \$0.50.

EXPERIENCE

Data Analyst Intern | WorldLink Communications, Nepal

Mar 2024 to Jun 2024

- Built two K-Means models in Python for Nepal's largest ISP (900k+ subscribers): a 4-segment customer grouping and a 3-group churn-risk model.
- Analysed a 1,600-respondent, 7-region survey in SPSS and presented segmentation and churn findings to the Marketing Manager to shape campaigns.

Operations Administrator | Project Partner Solution, Nepal

Aug 2024 to Jul 2025

- Built and maintained the company website and managed its hosting (cPanel, Cloudflare DNS).
- Handled client communication, administration and day-to-day coordination for a construction and design firm.

Trading Assistant (Part-time) | Sainsbury's, London

Oct 2025 to present

- Part-time alongside a full-time MSc in a high-volume store, working accurately in a team and following food safety and time-temperature procedures.

EDUCATION

MSc Artificial Intelligence | University of West London

Sep 2025 to Sep 2026

- Distinction (expected). Modules: Big Data Analytics, Deep Learning, Machine Learning, Responsible AI.

BSc Computer Science and IT | Tribhuvan University, Nepal

Jan 2020 to Aug 2024

- UK 2:1 equivalent. Modules: Statistics and Probability, Data Mining, Simulation and Modelling, Numerical Methods.

HACKATHONS AND OTHER PROJECTS

- **FRC Hackathon:** studied LLM hallucination on UK iXBRL filings. **Exoplanet ML Hackathon:** LightGBM quantile forecasting. **VLGE AI Hackathon:** 3rd place.
- **Earlier work:** Responsible AI framework for BART summarisation (bias, privacy, transparency); customer segmentation and discount elasticity analysis; facial recognition voting system with one-time passcode login.
